Kershaw Knives 1974-2006

Since 1974 we've been building the highest quality knives available. Our goal from the beginning was to build a "Tough as Nails" product and stand behind it.

Well, 32 years later and we're leading the industry in new product design and innovation, and we still offer our famous Limited Lifetime Guarantee.

1974 1978 1982 1986 1990 1994 199

A Master of his trade, Ken Onion, is one of the most-sought-after custom knife-makers in the industry. His custom knives can be found in the most prestigious private knife collections as well as in the pockets of his world-wide following.

When Ken was 5 years old he received his first knife. It was a cheap brand that his dad brought home from work and, after grinding off the point to make it as dull as possible, he gave it to Ken. Of course, this wasn't going to work and after countless hours of hard work on the sidewalk Ken managed to restore the point and cutting edge, only to have his dad confiscate it, scold him, and make it dull again.

Ken's early years were spent in Wellington, Ohio and Rochester, New York. When he was 12 his family moved to Palestine, West Virginia to a 213-acre farm where a teenaged Ken Onion was inspired by Vernon Ott, blacksmith and maker of garden tools and knives. In 1981, Ken graduated from high school, joined the United States Marine Corps and became a F4 Phantom mechanic for VMFA 212 out of Kaneohe Marine Corps Air Station. This move marked the beginning of Ken's quest to design the perfect knife. While stationed in Hawaii, Ken worked part time for Advance Aviation, restoring vintage aircraft. Since leaving the Corps in 1985 Ken has worked in various fields including construction, heavy equipment repair, and hydraulics repair.

In 1987 Ken moved to Anderson, South Carolina where he worked with robotics and automation for the Robert Bosch Corporation. After two years, Ken was hired by BHP Petroleum, in Hawaii and worked as a machinist and inspector. While shopping with his wife, Ken saw his first knife magazine, and after reading it from cover to cover, realized he wasn't the only enthusiast with a passion for knives. He subscribed to every knife magazine and annual available and became consumed by the knife craft. In November 1991, Ken met Stan Fujisaka, a very talented knife-maker who agreed to teach Ken the art of knife making.

After years of preparation–and some inspiration while working on a Harley cam for a friend–Ken created his first SpeedSafe® knife. Today, Ken designs a custom selection of knives for Kershaw, many featuring the patented SpeedSafe torsion bar system for assisted opening. His personal involvement throughout the design and manufacturing process ensures each knife meets his high standards for performance and quality.

Kershaw is proud to sponsor one of the world's toughest bull riders, Guilherme Marchi. Known as "Hollywood" for his star status, Guilherme is 2005's PBR World Finals Average Champion–as well as a PBR event champion in Montana, Missouri, and South Carolina. Guilherme finished the 2005 season ranked second in the world and has the highest riding percentage–66.3% –among the world's top 45 PBR bull riders.

As strong as Guilherme's 2005 season was, bull riding fans everywhere are looking for even more out of this Brazilian bull rider in 2006.

Guilherme's skill and toughness make him the right match for Kershaw's own tough and skillfully made line of products.

2002 2006

Blade Magazine's Overall Knife of the Year 2005

OFFSET

Model 1597

Steel.....Metal injection molded (MIM) 440C stainless-steel with Tungsten DLC coating
Handle...6061-T6 multi-colored anodized aluminum 3-D machined
Blade.....3 3/4 in. (9.5 cm)
Closed...5 1/4 in. (13.3 cm)
Weight...8.5 oz.

New '06 Product

The latest technology

gives birth to the newest style in the new Offset from Kershaw. The Offset's rugged and complex blade geometry is provided through state-of-the-art Metal Injection Molding (MIM) and hot isostatic pressing. It's a technique we call MITE–Metal Injection Technology with an Edge™. The result is a precision blade with two bevel geometries, hollow and flat, for incredible cutting power. Here's how MITE works: A blade mold is created and filled with a combination of powdered metal and binder. When it comes out of the mold, the blade is 20% larger than its finished size. The next stage of the process, sintering, removes the binder. Once it is sintered, the blade has reached its finished size and is at a density of 94%. Finally, the blade is HIPed under extreme pressure, approximately 32,000 psi, to increase the metal density to 99.7%.

In the Offset, this process produces a premium 440C-PM stainless-steel blade with complex, true 3-D geometry. But that's just the beginning. The Offset also features the latest SpeedSafe configuration. It's our new "Double Pumper" design and it features two torsion bars to ensure easy assisted opening for folding knives with larger blades–such as the Offset. It also offers a unique, splattered-paint handle in anodized 3-D machined aluminum.

What is SpeedSafe?

SpeedSafe® is the patented, assisted-opening system built into many of Kershaw's best-selling Ken Onion knives. SpeedSafe assists the user to smoothly open the knife with a manual push on the blade's thumb stud or Index-Open system. (Index-Open uses a protruding portion of the blade's finger guard to give the user an alternative to the thumb stud. The user manually pulls back on the protrusion with the index finger to open the blade.)

How does SpeedSafe work?

The heart of the SpeedSafe system is its torsion bar. Closed, the torsion bar helps keep the knife closed, preventing it from being opened by "gravity." In order to open the knife, the user must apply manual pressure to the thumb stud to overcome the resistance of the torsion bar. After the blade is out of the handle, the torsion bar moves along its half-moon track and takes over. The blade opens smoothly and locks into position, ready for use.

Is a SpeedSafe knife a switchblade?

NO! There are many unique features of SpeedSafe knives that make them quite different than knives that are considered switchblades. Unlike a switchblade, SpeedSafe blades DO NOT deploy with the push of a button in the handle or by gravity alone. Instead, the user must manually overcome the torsion bar's resistance—using the thumb stud or Index-Open protrusion on the blade itself—in order to engage the SpeedSafe system. Because the user must manually overcome the torsion bar's resistance, SpeedSafe knives fall fully outside the Federal definition of a switchblade. However, due to the complexity and constantly changing nature of these laws and regulations, it is impossible for Kershaw Knives to be aware of every restriction in every location in which our knives are sold or carried. It is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. At Kershaw, we are proud to be able to offer this convenient, secure technology.

Who are our SpeedSafe customers?

SpeedSafe was specifically designed for sporting and work situations where one-handed opening is preferable and safer. Its safe, efficient opening has made it a popular choice for hunters, fishermen, and those who require the one-hand opening function on the job-site.

How Safe is SpeedSafe?

Very. SpeedSafe technology is designed to be safe and secure. The blade opens ONLY when the user manually deploys it using either the thumb stud or Index-Open protrusion. Once deployed, a locking system secures the blade in position so that it cannot close accidentally. When releasing the lock, the blade does not snap shut due to resentence provided by the torsion bar. This bar also provides a bias towards the closed position (which holds the blade securely closed). New SpeedSafe users can ensure safe use of the technology by practicing to proficiency.

SPEEDSAFE® TECHNOLOGY WITH AN EDGE

Kershaw SpeedSafe knives are covered by one or more pending and issued U.S. patents, including: 5,802,722; 5,815,927; 6,145,202; 6,338,431; 6,378,214; 6,397,476; 6,427,334; 6,591,504; D438,085; D450,228; D454,043; D454,768; D455,062; D474,669; & D488,045.

1974 1978 1982 1986 1990 1994 199

Kershaw opens for business with its no-hassle, lifetime guarantee

Kai Cutlery Co., Ltd. of Japan purchases Kershaw Knives and creates Kai USA Ltd.

Kershaw expands line of Field knives, folding Pocket knives, and adds its Folding Fish Fillet knives.

1984: Kershaw expands its market into Europe as Kai Cutlery Europe.

1985: Kershaw moves into its new facility in Wilsonville, Oregon.

1986: D.M.D. the biggest selling small knife surprises gold new colors. Salesmaster Sheets introduced.

1990: D.M.D. the biggest selling small knife surprises gold new colors. Salesmaster Sheets introduced.

New series added to the Kershaw product line: American Hand-Crafted Plus, Silver Touch folders, Muelgo work knives, and a new line of dress knives and accessories.

1991: Kershaw's limited edition Screentaw originals by renowned artist Walter Alexander, expands to include hunting knife, Africa wildlife, waterfowl and North American wildlife.

Kershaw's ever popular Blade Trader series recovers a new handle design, and the line is expanded to include a Hunter's Blade Trader and Fishermen's Blade Trader.

1995: Two new series added to Kershaw's product line: Liner Lock models and the unique Lever Action series.

1996: Medium Blade Trader model 08644, with patented gut hook skinning blade added to line.

1997: Kershaw introduces the Multi-Tool, model 1070C, and ceramic patterns on its unique, ambidextrous locking liner.

Kershaw locking liner, stud-lock and lock back knives are covered by one or more pending and issued U.S. patents, including: 6,338,431; 6,378,214; 6,427,334; D438,085; D450,228; D454,043; D454,768; D455,062; D467,783; and D479,114.

New 06 Product

Next Generation Blade Design & a New SpeedSafe On/Off Option

Ken Onion's innovative Bump "re-curve" blade–found on our new Spec Bump and Speed Bump–is designed for minimal mass, maximum performance, and multi-tasking efficiency. These unique blades offer ideal leverage in tough cutting situations and a precisely centered point to handle piercing tasks. For 2006, Ken combines another high-performance blade shape with our new SpeedSafe On/Off option in the Cyclone and Mini Cyclone. The new Cyclones offer the ability to enable or disable the SpeedSafe function. Set it one way and you get fully manual operation.

2002 2006

CYCLONE
Model 1630
Steel.....Sandvik 13C26 stainless-steel

Liner.....410 stainless-steel
Blade.....3 3/16 in. (8.1 cm)
Closed...4 1/4 in. (10.8 cm)
Weight...5.3 oz.

Set it the other and the SpeedSafe system engages to assist blade opening smoothly and easily. Either way, you get the styling, precision, and performance you expect–and deserve–from Ken Onion and Kershaw.

CYCLONE ON/ON
Ambidextrous Opening

1974 1978 1982 1986 1990 1994

Blade Magazine's Most Innovative American Made Knife of the Year 2005

E.T.
Model 1900ST
Steel.....Sandvik 13C26 stainless-steel with bead-blasted finish
Handle...6061-T6 anodized aluminum
Blade.....3 1/4 in. (8.3 cm)
Closed...4 3/4 in. (12.1 cm)
Weight...3.7 oz.
Includes carabiner clip and bottle opener

E.T.
Model 1900
Steel.....Sandvik 13C26 stainless-steel with bead-blasted finish
Handle...6061-T6 anodized aluminum
Blade.....3 1/4 in. (8.3 cm)
Closed...4 3/4 in. (12.1 cm)
Weight...3.7 oz.
Includes carabiner clip and bottle opener

E.T.
DESIGNED BY GRANT AND GAVIN HAWK

E.T. (URBAN CAMO)
Model 1900UCBLK
Steel.....Sandvik 13C26 stainless-steel with Tungsten DLC coating
Handle...6061-T6 anodized aluminum
Blade.....3 1/4 in. (8.3 cm)
Closed...4 3/4 in. (12.1 cm)
Weight...3.7 oz.
Includes carabiner clip and bottle opener

Precision, Performance, & Impressive Styling

It's called the E.T. But not for its out-of-this-world looks. E.T. stands for External Toggle.

The External Toggle is Kershaw newest technology for deploying and securing a blade. And it offers a number of unique benefits–like extreme security.

Fold the blade in, engage the safety, and the blade is secure no matter how or where you carry it.

2002

2006

RIPCORD

Model 3200

Steel.....Sandvik 13C26 stainless-steel with Tungsten DLC coating
Handle...6061-T6 anodized aluminum with Trac-Tec inserts
Blade.....3 7/16 in. (8.6 cm)
Closed...4 3/8 in. (11.1 cm)
Weight...4.2 oz.
Includes belt clip with deployment knob

To Deploy the Blade:

1. Grasp the handle.
2. Rotate the handle 80-100 degrees until the handle is horizontal
3. Slide the handle to the rear.
4. Remove from knob on clip

Blade is now deployed, locked and ready for use.

To Retract the Blade:

1. Hold the knife horizontally with the slot towards the clip's protruding knob.

2. Locate the large opening at the end of the slot on the handle. Firmly press the knife against the knob at this location (the knob will enter the opening and cause the lock function to disengage).
3. Slide the handle forward until a positive stop is noticed (this action will cause the blade to retract into the handle).
4. Rotate the handle downward to a vertical position, or simply let go of the handle.

Blade is now safety stored in the handle.

New 06 Products

Another unique entry is the Ripcord. The Ripcord's patented design lets you store it in the space of a folding knife, yet it provides the strength and stability of a fixed blade knife. With Kershaw's "Out the Front" (OTF) design the blade slides out the front of the handle into a secure, fixed-blade position. To store it, just reverse the process.

SPEEDSAFE
TECHNOLOGY WITH

Small, Powerful, & Pocket-Perfect Chives

Kershaw's popular Chives come in a variety of technologically advanced handle finishes–one sure to suit you.

Choose from bead-blasted stainless steel, Boron Carbide, or our handsome "smoked" anodized aluminum finish in three colors. The Chive also comes in Jeep's "Cracked Mud" design or our handsome "Rainbow Trout."

The 3-D images are applied using a unique new photographic process that permanently transfers the image to the anodized aluminum handles. All Chives share Ken Onion's distinctive styling and the SpeedSafe ambidextrous opening system. For ease of carrying, they also include a removable pocket clip.

Scallions with Bite

New 06

Kershaw's Ken Onion Scallions are designed to meet the needs of the knife user who wants SpeedSafe technology in a smaller carrying knife. Naturally, all Scallions feature SpeedSafe ambidextrous assisted opening, plus our secure locking liner.

They also feature an enormous range of handle designs. Choose from basic black polyamide, colorful anodized-aluminum, or our 3-D photographic images. The colors are created in the anodizing process, hardening the aluminum and producing a porous, oxide coating that can absorb dyes. The images are applied in a unique new photographic process that permanently transfers the image to the handles. The colors and images are not only great looking, but durable and scratch-resistant, too.

Kershaw's Ken Onion Leeks with SpeedSafe®

Our popular Leeks come in a variety of handle styles with technologically advanced coatings–one sure to suit you.

Choose from bead-blasted stainless steel, Titanium-nitride, or our handsome "smoked" anodized aluminum finish in three colors. Please note that due to the nature of the double-anodizing process, which produces the smoked finish, no two knives are ever exactly alike. Yet, all share Ken Onion's distinctive styling and the SpeedSafe ambidextrous opening system and include a reversible/removable pocket clip.

Kershaw's SpeedSafe Folders

From the sleek Centofante-Onion and Mini Mojo to our big, bold folders, Kershaw offers a wide selection of popular SpeedSafe knives. On the compact end of the spectrum are the Centofante-Onion, co-designed by Frank Centofante and Ken Onion, along with the Baby Boa and Mini Mojo from Ken Onion. On the larger end of the scale, Kershaw offers popular Ken Onion folders like the Blackout, Whirlwind, and Avalanche.

All fit the hand perfectly, are engineered to perform without unnecessary weight, and are built to handle a huge variety of tasks. Whichever you choose, you get Kershaw's renowned style, precision, and performance.

Kershaw's SpeedSafe Blurs are Turning Heads

Looking for top performance and attention getting style? Look to the Kershaw Ken Onion Blur series. Kershaw combines SpeedSafe with Trac-Tec inserts for fast response and a secure grip. Inlayed in our lightweight aluminum handles, the rough Trac-Tec material provides a non-slip grip even in wet and slippery conditions.

The new G-10 Blur is a real head-turner, too. It features SpeedSafe technology, premium blade steel, and aluminum handles accented with striking "Silver Twill" G-10 inlays. Naturally, the G-10 inlay not only looks good, but provides function too. It offers superior mechanical and dimensional stability and enhances a sure grip even in a variety of conditions.

Rescue & Emergency Situations Call for Quick Action

Ideal for extreme situations, this collection of Blurs and Responders offers power and performance.

SpeedSafe-equipped Rescue Blurs have rounded-tip blades for safer cutting in close or dangerous situations.

Non-slip Trac-Tec handle inserts provide a secure grip. Rescue Blurs also feature a carbide glass-breaker tip for emergency use.

RESPONDER

Model 1078

Steel.....AUS8A stainless-steel with Black Teflon® coating
Handle...Double injection-molded Santoprene®
Blade.....3 3/4 in. (9.8 cm)
Overall...8 3/4 in. (22.3 cm)
Weight...4.8 oz.
Includes Kydex® sheath

RESPONDER

Model 1078YL

Steel.....AUS8A stainless-steel with Black Teflon® coating
Handle...Double injection-molded Santoprene®
Blade.....3 3/4 in. (9.8 cm)
Overall...8 3/4 in. (22.3 cm)
Weight...4.8 oz.
Includes Kydex® sheath

The new Responder features a fixed blade with full-tang construction and a non-slip Santoprene® handle. The partially serrated blade and cutting hook zip through most material with ease–including line, webbing, clothing and seat belts–but the tip is blunt for safety. The multi-function Kydex® sheath offers multiple carry options and has both cord eyelets and strap slots.

Onion Styling in Thumb Stud Opening Knives

For knife users who want a quality knife at a value price, Kershaw's Storm and Vapor lines of folding knives provide the answer. All Vapor models feature a sleek, high-tech look combined with super-smooth one-handed, manual opening. The stainless-steel handles are decoratively drilled for an industrial-tech look. This open construction provides for a strong, yet airy, design. Choose from two sizes and two finishes; bead-blasted stainless steel or Titanium-nitride coated stainless. The Storms, in two sizes, provide rugged styling with sure-grip Trac-Tec handle inserts. Whichever you choose, these everyday carrying knives offer plenty of flair.

Style or Cutting Power? There's No Need to Choose with these Premium Pocket Knives!

Kershaw offers a handsome selection of folding knives that combine great style with the quality and precision of Kershaw manufacturing. Choose the Splinter, Sapphire, or Nakamura for a dress knife that's dressed for success. The Splinter Model 1460 and the Nakamura feature variegated Quince wood handles. The Sapphire offers a sapphire-blue titanium handle. Or choose our one-of-a-kind Splinter with its "smoked" anodized aluminum handle.

High-Performance, Hard-Working Knives

Kershaw's Liner Action knives feature light, strong die-cast aluminum frames, razor-sharp blades, and our secure locking liner. The liner holds the quality blade securely in place, yet releases easily when they're ready for use.

Our Liner Action models also include a convenient thumb stud for one-handed opening. All models except the 2410 and 2410ST include a removable pocket clip.

Our Western Style knives are sturdy work knives, pure and simple. They're designed to perform and they've proven themselves again and again. All Kershaw Western Style knives feature a locking back for safety.

FIXED BLADE

Kershaw's water sports knives feature sturdy stainless-steel construction, yet their open-tang handle design cuts down on unnecessary weight. Both Sea Hunter models offer injection-molded handles with neon accents so they're easy to see in a marine environment. Both Sea Hunters and the Amphibian come with the Kershaw Diver's Sheath with quick-release buckles. You can attach the Diver's Sheath to a life vest lash tab, netting and a variety of webbing.

Fixed blade lovers will covet our classic Trooper or Military Knife with its quick-release sheath and multiple carry options. In the water or in the field, these specialty knives always offer an ideal combination of durability and functionality.

Specialty Tools for the Angler

Kershaw fillet knives always feature quality high-carbon stainless-steel blades with the ideal degree of flex for fast and easy filleting. So what could be better? Power. Plug our new Electric Fillet Knife into any standard outlet and glide through every fillet job. There are two blade sizes and the Electric Fillet even comes with a handy storage bag.

For electricity-free filleting, choose one of our fixed-blade fillet knives with sure-grip handles or the 7-Step Fillet Knife, which adjusts from 5 1/2 to 9 inches. For the ultimate in compact filleting, go for the Folding Fillet Knife. Pair any fillet with our compact and durable Skeeter Fly-Tying Scissors.

Compact, Versatile, Multi-Functional Tools

CARABINER TOOL

The unique Kershaw Two Can is a combination knife and scissors tool. The patent-pending tool features two blades that can be used separately or together. Open one blade and use the Two Can like any pocketknife. But when only a pair of scissors will get the job done, open the Two Can's second blade and you've got an easy-to-use pair of scissors.

Another versatile tool is Kershaw's patented, five-in-one Carabiner. You get a knife blade, flat-head screwdriver, Phillips-head screwdriver, bottle opener and carabiner. The carabiner clips the tool to vest, backpack, or belt loop with ease. Kershaw Carabiners come in three colors, while the National Geographic model comes in two sizes and materials.

For Kershaw & Partners, Teamwork Works

Kershaw is proud to join forces with other fine organizations and companies to bring you a variety of quality tools–tools that serve a greater purpose. For instance, Kershaw has teamed up with the National Wild Turkey Federation to offer five different hunting knives and sets, each emblazoned with the handsome National Wild Turkey Federation logo. A portion of the proceeds from each sale benefits the Federation.

Kershaw is also manufacturing a selection of knives and tools exclusively for Jeep®. Each offers Kershaw's renowned technology and performance paired with Jeep's rugged style, quality–plus the popular Jeep logo.

Jeep

HAT

Model HAT2

stand to our smaller countertop displays that hold a single knife, we have the perfect display to suit your needs.

Whichever one you choose, you'll appreciate the convenience and sales-generating power of these handsome displays.

LIABILITY DISCLAIMER

Kershaw Knives are intended and sold for legitimate sporting purposes only. The purchase, use, and ownership of knives are subject to a wide variety of local laws and regulations. Certain knife styles, blade designs, and blade lengths are not allowed in specific areas. In light of recent events involving national security, knives may not be permitted in government buildings or on government property (such as court houses, federal offices, national monuments, and airports), and government officials may take the position that knives are "weapons" under applicable laws. Due to the complexity and constantly changing nature of these laws and regulations, it is impossible for Kershaw Knives, to be aware of every restriction in every location in which our knives may be sold or carried. It is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. You, and not Kershaw Knives, are solely responsible for any claims resulting from violation of these laws and/or regulations.

Kershaw products are made in the USA, Japan, Canada, Taiwan, Mexico, Sweden and China as indicated on the product.

We reserve the right to change specifications, materials, or discontinue products at any time without notice.

LIMITED LIFETIME WARRANTY

Kershaw products are guaranteed for the lifetime of the original owner to be free of defects when received from the factory. Any product we find to be defective in its original material, construction, or workmanship will be repaired or replaced with the same item or one of equal value at no charge. (Of course, normal wear, abuse such as prying with the knife, or neglect are excluded from this non-transferable warranty.) For warranty service, please return product via UPS or insured mail. Include your name, address, telephone number, proof of purchase (sales slip), and a short explanation of the warranty service requested to the address below. Please allow 4-6 weeks for delivery.
